

INDONESIAN GAS/LNG INDUSTRY 2024

TWO DAYS COURSE BASIC

This introductory two-days Gas & LNG Short Course is designed for participants seeking to understand the basic technical and commercial aspects of the Gas and LNG Value Chain. The course covers an overview of the LNG industry from global supply and demand, domestic market outlook to LNG facility operations, small scale LNG facilities and distribution, and commercial issues including pricing and contracts. LNG operation and business models will be discussed in a case study.

The course is suitable for engineers, operational staff, and business and marketing executives new to the Gas and LNG industry, as well as specialists looking to broaden their general knowledge of the Gas and LNG business.

BATCH II

Monday - Tuesday

29-30 APRIL 2024

ALILA HOTEL, SOLO

BATCH IV

Monday - Tuesday

26-27 AUGUST 2024

FOURPOINT HOTEL, THAMRIN, JAKARTA

Course Content

Content 1

What is LNG

- 1.1. Natural Gas
- 1.2. LNG Properties
- 1.3. Natural Gas Processing
- 1.4. Gas Liquefaction Process
- 1.5. LNG Conversion Factors & Delivered LNG Value

Content 2

LNG Infrastructure

- 2.1. LNG Plant
- 2.2. LNG Shipping
- 2.3. LNG Onshore Tanks
- 2.4. LNG Regasification/LNG Terminal & FSRU

Content 3

LNG Operation & Safety and Regulations

- 3.1. LNG Operation
- 3.2. LNG Custody Transfer
- 3.3. LNG Safety & Regulation

Content 4

LNG Commercial

- 4.1. LNG Business Model
- 4.2. LNG Prices
- 4.3. LNG Trading
- 4.4. LNG Sales Contract
- 4.5. LNG Shipping Contract

Content 5

Global and Indonesian LNG Outlook

- 5.1. Global LNG Outlook

Content 6

Domestic Gas Market Outlook

- 6.1. Domestic Gas Business Overview
- 6.2. National Gas Supply Demand
- 6.3. Gas Infrastructure
- 6.4. Gas Price & Commercialization
- 6.5. Gas Business Issues

Content 7

- Case Study

Limited 30 Seats !
